

The extended Regional Promotions Programme commenced in late September 2015, after the KPIs were signed-off by NRC CEO. This report then covers three months activity until 31 December 2015.

### **Business Growth Programme Highlights**

- The forestry First Region Lumber coalition has been formed with four companies under a new structure
- Northland Inc intervention allowed for double the number of attendees to make it to the Taste of Auckland show, a new 'Savour' brand was developed and enhanced the regional offerings at the show
- Secondment relationship was developed with WDC (.25FTE) to ensure stronger focus on investing in Northland
- Landing pad activities, (outside NEAP projects) includes inviting investors to look at \$26 million worth of deals in the private sector (Northland wide), and strengthening relationships with investors across NZ
- A new coalition of tourism businesses has been formed, under the title of Northland International Marketing Group. Group members will pay an annual membership fee of \$2,500 to fund an extension to Northland Inc's offshore tourism marketing, allowing for an extension of activity to take place in developing markets including China and South America and, if an analysis to be undertaken in Q1 2016 confirms the value proposition, India also.

#### **Destination Marketing**

#### Tactical Plan

- To date four new sellers have committed to featuring Northland in their in-market holiday programmes
- The trade familiarisation 'season' for 2016 will focus on the February to May period, in line with Tourism New Zealand's current focus on shoulder season activity and due to peak season capacity constraints emerging around the country given the current high levels of international visitor growth.

## Conference

• The additional funding now allows for the re-introduction of a conference marketing function within Northland Inc, with the programme to be developed by Q2 2016.

# Trade Channel Marketing

- A significant result of the additional funding provision has been the confidence given to businesses to invest more in international trade marketing onshore, through the annual TRENZ buyer-seller exchange to be held in Rotorua in 2016
- By year-end 2015, 15 Northland tourism businesses had paid their deposits to attend the trade show in 2016, up from just 6 in 2015
- Northland Inc has made a small subsidy available to encourage first time participants to attend totalling \$6,000, while total industry investment in the show has grown to approximately \$150,000 for 2016
- Northland Inc will extend activity into China and South America in 2016, participating in Tourism New Zealand's 'Kiwilink' trade shows in both marketplaces in late 2016.

#### Digital Marketing

- At year-end 2015, digital results showed an extension of audiences reached across both our website and social media channels. Changes in the reporting available via Google Analytics means some measures have now been superseded
- A major photoshoot was completed in November 2015, using internationally renowned destination specialist photographer David Kirkland. Some 60 images were added to the image library, with all shots created having a 'campaign focus' and featuring people-interaction as a central theme
- A Chinese language Trade Directory of tourism products and services was published in October 2015, and is being distributed via Chinese trade channels; this production was cost-neutral due to industry advertising contributions.
